 - **METRITIS** (Taylorella)
 - **KLEBSIELLA**
 - **PSEUDOMONAS**
2. a negative **endometrial** swab test to be taken on an unused heat, for :
 - **METRITIS** (Taylorella)
 - **KLEBSIELLA**
 - **PSEUDOMONAS**

HARAS DE MONTAIGU

- a general and complete bacteriology
- 2. **EVA** - a negative serological or ELISA result (taken after 01/01/25 **but within 30 days of the covering**)

EVA

Taken after 01/01/23 and **within 30 days** of covering.

- Either 1 negative serological or ELISA result
- Either 2 positive serological results taken 14 days apart, the second one is constant or declining
- Either 1 positive serological result taken in 2024 that is constant or declining compared to the last result from the previous year (both results must be presented)

ALL RESULTS MUST BE SENT TO THE STUD BEFORE COVERING:
monte@harasdemontaigu.com

COGGINS

All mares coming from outside France must be accompanied by a negative Coggins test, taken after 1st January 2025 and within 28 days prior to arrival at Haras de Montaigu.

NASAL SWAB

All racing fillies coming from outside France must have proof of a negative nasal swab for EHV 1,4 taken within 1 month of the first covering.

DOURINE

Mares arriving from Italy and mares arriving from outside France who have been in Italy since 1st January 2011 will require two negative blood tests for Dourine, the first to be taken within a 28 day period prior to arrival in France, with the second to be taken at the boarding stud, a minimum of 14 days after arrival.

HIGH RISK MARES

HIGH RISK MARES - those who have had previous contact with CEMO or **who originate from countries outside France, Germany, Ireland, Italy and the United Kingdom** require:

Before first time of covering:

- **Two** negative clitoral swabs taken at least seven days apart at the home premises or the boarding stud, taken after 01/01/25.

HARAS DE MONTAIGU

Swab test results must be certified negative for **CEMO, Klebsiella pneumoniae (capsule types 1, 2, & 5) and Pseudomonas aeruginosa.**
